# RSNAV.com CarPlay interface for 3G MMI (B8)

Version 1.0

Warning: Professional installation recommended. Mask the working trim surfaces properly, otherwise, it will be scratched easily while installing!

1. Installation

   Using, VW radio removal tool, pull control unit 1 for infromation electronics –J794—1- out of mounting frame, and using fork lift tool –A-, remove the climate control unit by pulling from holes –B, C-. Be careful when pulling out the climate unit as it is attached with four spring clips.

   Release and unplug necessary connectors at the behind of the control unit

2.

   A. Connect the cable harness as described above. Place the interface behind the climate control on a flat surface and mount it firmly using cable ties or double side tapes.

B. Routing USB port to cigarette socket in front: Remove the shifter using Trim Removal Wedge Pry(like 3409) and put your hand into the bottom of the center console like –A- and push up like –B- and remove console carefully unplugging connectors.
C. Remove ashtray cover by removing two bolts -4, 5-, and lifting up latch -2- from -3-, and take out the cover -1- and remove the whole ashtray assembly. Unplug cigarette lighter socket.

Mount the supplied USB extension to the cigarette lighter socket and run the USB wire to the main harness of the interface and connect it into the USB port in the harness.

D. Reassemble everything back.
